ANNUAL REPORT

2020-21

LALA DESHBANDHU GUPTA
(14 June 1901 – 21 November 1951)

Born as Rati Ram Gupta in 1901 in Panipat, he was given the title “Deshbandhu”, or friend of the nation, by Swami Shraddhanand and Mahatma Gandhi. Popularly known as Lala Deshbandhu Gupta, he was a veteran freedom fighter, legislator and journalist.

He contributed in Lala Lajpat Rai's newspaper "VandeMataram" as an editor, thus beginning his life-long association with journalism. As both a journalist and Constituent Assembly member, he is known to have staunchly supported freedom of the Press in India and argued for assembly status for the National Capital Territory of Delhi. He played an important role in controlling communal tensions and maintaining harmony during partition in Delhi. Unfortunately, he died in a plane crash on 21st November, 1951 while on his way to Calcutta (Now Kolkata).

His contribution to the country as a distinguished legislator, reputed journalist and a revolutionary freedom fighter is memorialized in the name of the college that we are all proud to be a part of.

“Selfless work is the basis of social service” - Deshbandhu Gupta

It is a pioneering practice utilized to harvest rainwater from roofs and to be stored in tank for later use for gardening, crop irrigation, laundry, and flushing toilets. It has an ample number of exciting benefits like backup source of water, ecological benefits and reduces soil erosion.
- **Green Campus and Green Buildings:** The newly developed Green belt of the College uses the concept of rainwater harvesting and it has been designed such that the lower layer of the green belt soil is consisting of fragile material while the upper or top layer of the soil is consisting of clay.
- **Eco Club:** In a drive for the green campus by the Eco Club of the college, 3.5 acres of landscape area has been developed in the backyard with over 500 new plants and grasslands enabling maximum biodiversity and bio-conservation.
- **Sedimentary Rock:** A classic sedimentary rock believed to be 100 million years old has been found during the dig and set for display in the campus itself to highlight the environmental heritage of the institute. The rock sample was examined by Department of Geology, University of Delhi.
