

Talk by Stanzin

Latest addition to the colloquium lecture series was delivered on 31st January, 2020. The talk was delivered by a wild life lover Stanzin Nubu of B Sc Hons Zoology IV semester. The topic of his talk was “**The Changpas and Snow Leopard**”. Everyone present in the hall visited Ladakh vicariously along with his narrations and beautiful slides. He also made the audience aware about the topography of Ladakh with special emphasis on the Changpas, semi Normadic people of that region and their relationship with Snow leopard. The continuous killing of Snow Leopard by Changpas in order to protect their cattle is becoming a major concern as the population of Snow Leopard is declining and the ecosystem around is getting disturbed. The talk proved to be an eye opener for all present over there and encouraged us to take steps for the conservation of this Big Cat.
