

## **An Appeal to Students**

As all of you are aware about the vulnerable times we are passing through, I would like to wish you all health and peace at your end. We, like your parents want you to remain protected from the exposure to infection of Covid-19. Your lives are precious to us. Our Prime Minister, Mr Narendra Modi-ji in this regard, has appealed to us all to remain indoors for our own good by announcing a nation wide lockdown till April 14, 2020. India is trying all feasible measures to stop the spreading of the infection at the earliest on a war footing. But it is not possible without our understanding of the gravity of the matter and required cooperation. Each one of you has to be responsible for your own safety, maintaining social distancing and practising daily hygiene, eg. washing of hands a number of times a day.

At any rate, please avoid all kinds of travels, however short, to keep yourself away from the possibility of contact of other humans who might be unknowingly carrying the infection and get you in trouble. Further, stay away from any public gathering/parties for the same. Stay wherever you are, at home, paying guest facilities, hostels etc for the time being and do not panic. It's an extraordinary situation and we must fight through it.

Meanwhile, please keep in touch with your teachers, consult college website for study materials and use the time to your advantage.

May we all take prescribed precautionary measures seriously and work together to stop the spreading of infection likely to be caused by Covid-19.

We remain,

Principal

All Teachers and Non-teaching staff

Deshbandhu College
